Vera,

Here's data I compiled from the event.

This for briefing upper mgmt. on the RF FYR -- with regard to the big precip events/flood of 2013, it would be very useful for me to have a summary of the actual event, the damages caused (ie, sampler collection pipe damaged by logs, loss of sampling ability for xx hours) and response actions implemented (ie, having extra sampling container available in case of higher flows, etc). Also I recall there was a power point presentation at the RFSC – could you also send it. Thanks!
